

It is sad that instead of offering a competitive solution the NAB seeks to silence XM Radio from offering traffic and weather reports. I personally benefit from XM instant traffic and weather due to the fact that the information I am looking for is available immediately, or within one minute as opposed to irregular updates on some or ten minutes on the more news oriented locally broadcast stations. That there should be any discussion in the United States about a subscription service being regulated or prevented from offering it's subscribers less information is absurd and akin to a communist country. Please let it be known that I OPPOSE the NAB petition 04-160 that would in any way reduce the benefits that I already receive from my SUBSCRIPTION to XM Radio. I PAY for the information being offered- why should a group like the NAB have any say in what I am allowed to PAY FOR!!!!.

NO NO NO NO NO on NAB Petition 04-160

Respectfully
Chris Sciumbata
